MILITARY BLUEFIN W/ W.I.P. & V.M.S.  
NO.1030

Eliminates that complicated and time consuming rigamarole of putting on and taking off tank, backpack, regulator, and buoyancy control separately. SEATEC's BLUEFIN allows the combination of these components into one comfortable and easy on/easy off system. Just one adjustable multi-size comfort belt system on your waist with additional adjustment chest and waist buckles.

SEATEC pioneered the concept of a stabilizing vest with unrestricted arm movement. BLUEFIN's advanced design, with non inflating side panels for total wraparound buoyancy, is the essence of that concept. With BLUEFIN, surface and underwater swimming in any position is easy. A diver floats comfortably in a vertical position at the surface. No more fighting to keep from going face up or face down.

Built to last, the rugged BLUEFIN's sturdy outer bag is made from SEATEC's 1000 Denier Cordura Nylon to give you years of dependable and comfortable use. Of course, BLUEFIN's inner bag features SEATEC's puncture resistant urethane bladder.

More lower buoyancy, contour fit slim-line styling, a unique Variable Mounting System (V.M.S.) for backpack plate holder, sternum strap, a secondary tank stabilizing strap in addition to the popular seaband and a rugged carrying handle. Plus these standard quality SEATEC features: shoulder sleeves for optional strap use, and side adjustments for perfect fit. Two utility pockets, double front belt loops for custom fit, over pressure relief valve with quick dump, mesh drainage and air relief, accessory hose holders and utility rings on both sides, and SEATEC's Co2 detonator system - the only detonator system rugged enough to stand up to regular diving use.

Available in 2 military color combinations.
